BEFORE YOU READ

Do you ever think about living on another planet other than Earth? What do you know about the Sun, the stars, and our solar system?

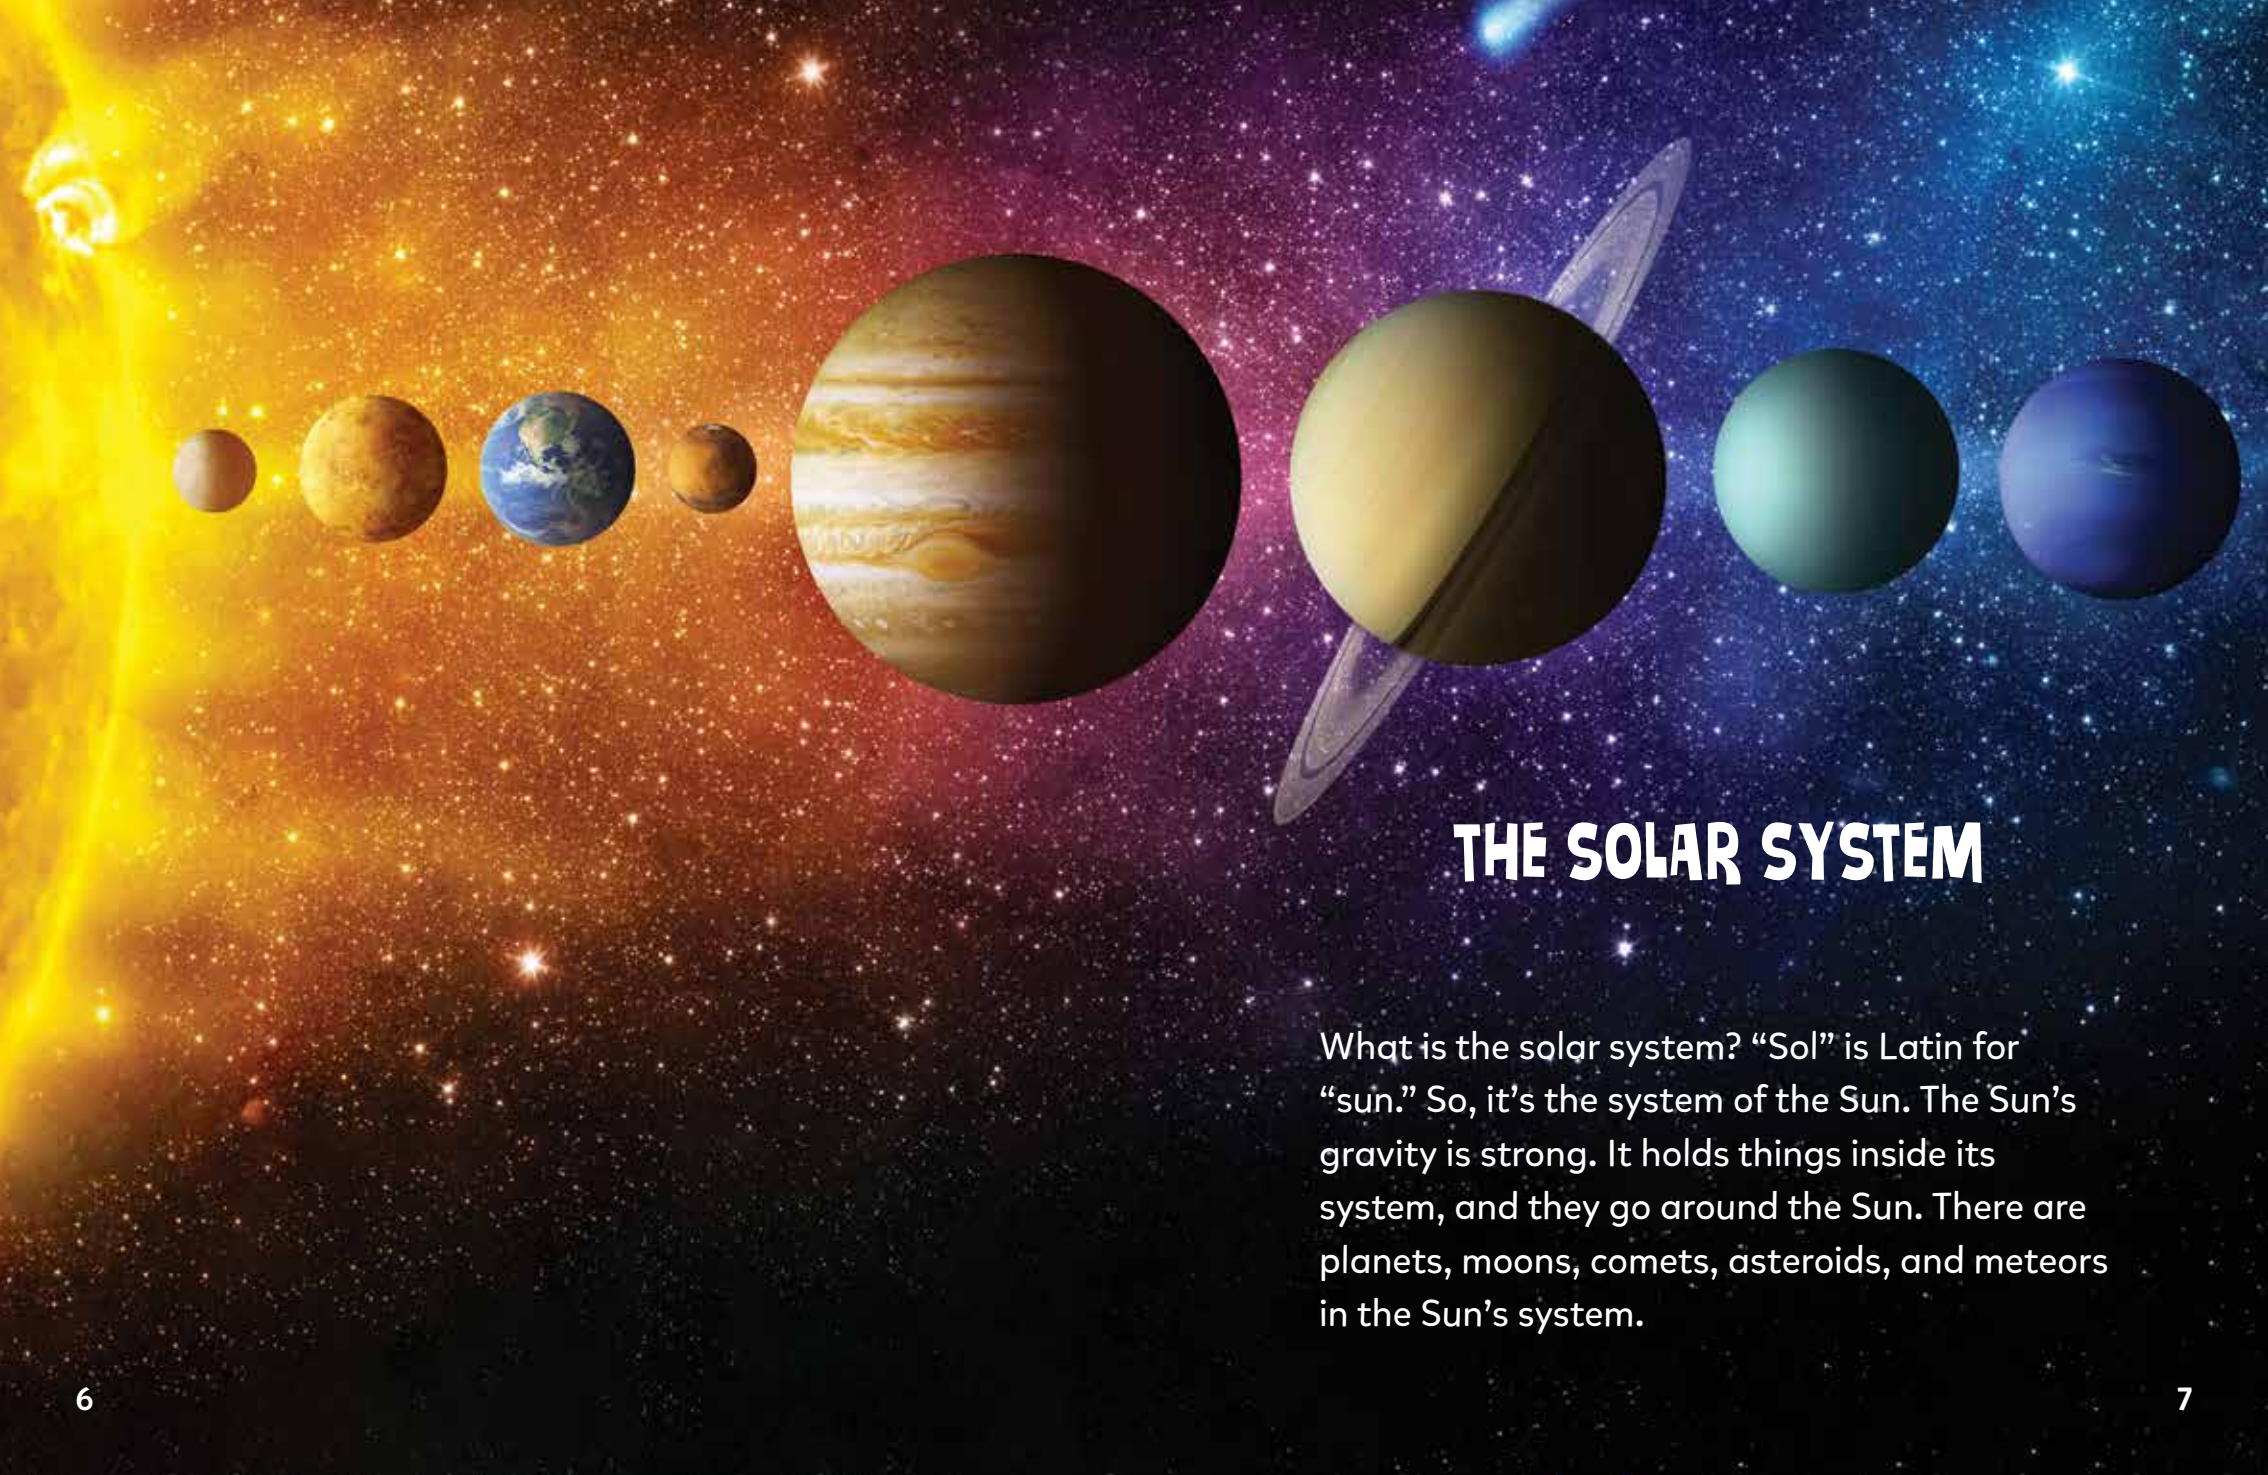

Do you want to become an astronaut and travel through space?

DON'T FORGET: There is a glossary on the last pages of this book where you can look up the meanings of the words you don't know.

INTRODUCTION

When you look at the sky, what do you see? Clouds? A blue sky? The Sun? At night, the Moon or some stars? Do you ever think about them and our solar system?

THE SOLAR SYSTEM

What is the solar system? “Sol” is Latin for “sun.” So, it’s the system of the Sun. The Sun’s gravity is strong. It holds things inside its system, and they go around the Sun. There are planets, moons, comets, asteroids, and meteors in the Sun’s system.
